	 <p>54+1+1 ★ ★ ★ ★ $x > 830 \text{ mm}$</p>

Active Safety elements

- Driver's seat with wide range of visibility with no blind spots
- Wide range of visibility by means of triple rear view mirrors and rear view camera
- Windscreen demister, powerful and effective
- All side windows of driver with double glazed windows
- Retractable headlights protective device
- Main headlights bi-xenon
- Corner and fog headlights
- Indicators with LED technology
- State-of-the-art windscreen wipers with wide coverage
- Electric rolling sun visors

Passive Safety elements

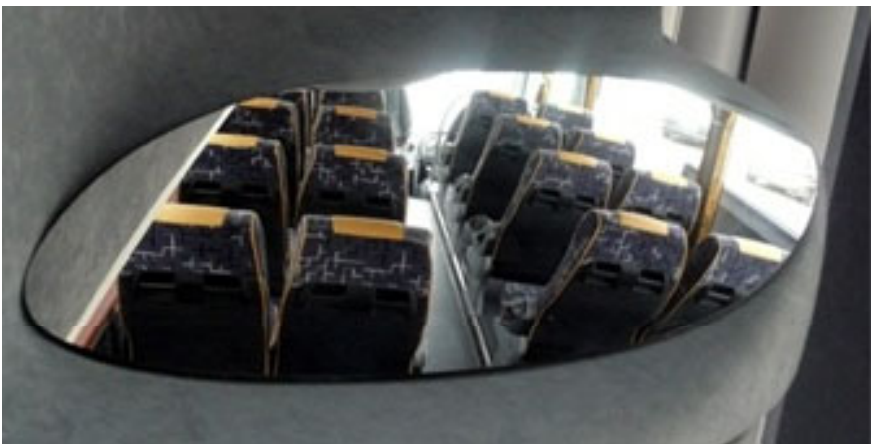

The structure is designed according to the concept of **DROP (Dynamic Roll Over Protection)**, which offers better carrier protection, especially at high speed tipping: tipping at 80km/hr, roof displacement to the rear is reduced by 70%.

Special attention has been paid to protecting the front part of the bus against frontal collision: Elimination of the driver's door allows for reinforcement of the frame, incorporating deformable triangulations that, along with the design of an anti-collision front structure, allowing for a high survival rate.

All seats include high resistance docks and seatbelts.

Passion for detail

S'AGARÓ Platinum is the fruit of 75 years of experience in bodywork. A new project that enhances the performance attributes of elegance, clean lines, functionality and design that have given prestige to the range **S'AGARÓ** whose aesthetic always transmit a current image without registering the passage of time.
